About This Software

SceneThere lets you create and explore interactive 360-content from exotic places such as Thailand, North Korea and Burning Man.

Navigate from point to point in a 360 film just by clicking on the blue hotspots.

Using SceneThere's tools anyone with a 360-camera can create rich interactive stories. Together with leading 360 filmmakers we create unique VR-experiences that bridges films and games.

SceneThere believes that 360 films can be something more than linear storytelling. That's why we're the first application to introduce the ability to hyperlink 360-videos with hotspots.
